30 April 1954

MEMORANDUM FOR: THE RECORD

SUBJECT: Recommendation that Project P-87, Bogus Polygraph, be Considered Closed

1. A request to consider this project was received and approved in June of 1952; however, little work was done to instigate the program due to the apparent lack of an operational requirement for such a device.

2. Recently, the undersigned discussed this program with Mr. [redacted] 25X1 of Security Division, who indicated that much consideration had been given to such a device by responsible parties in Security, and although at times it seemed that an item of this type would be desirable, a realistic operational situation never occurred where one could be used. Apparently, it is the feeling of the Security Division that if such a device might be of use during an operation, other more drastic means could be employed in lieu of it.

3. Accordingly, it is recommended that this project be carried within APD as closed.
